

Quinnox's **Business Intelligence service** helps reduce the report generation time by **50%** for **world's largest apparel company**

The client's top management faced challenges due to the lack of reports to forecast future business. The delayed turnaround time for generating accurate data and critical reports also added to the challenge.

Quinnox provided BI Modeling, Analytical & Managed Services to this client in the SAP BI space.

Results:

- Architected a standalone BI system
- Migrated and optimized the data model for unstructured data
- Developed new KPI reports and optimized existing reports
- Implemented warehouse modules for management and engineering changes
