

Quinnox Quality as a Service

AI Augmented Quality

Our POV on changing landscape of Quality

Insightful business leaders understand that software development and its application are just as important from a business perspective as a technical one - applications provide the foundations for an organization's key offerings and, by extension, its brand and reputation.

The challenges businesses face have been going through a cycle in the last decade. Economic volatility, skill scarcity, cost controls, business and technology risks. In addition, businesses are continuously threatened with being made redundant by the introduction of new technology.

AI has been a significant game changer in businesses' reactions to decade-long challenges. The industry leaders are not just early adopters of AI trends but continuously invest and co-innovate solutions with partners.

Quinnox has been a preferred partner for its customers for over a decade. Quinnox's Quality as a service provides AI advantage to the testing process, delivers results that impact business, and reduces software development and maintenance costs by up to 30% using shift-left practices.

The AI-augmented testing capabilities improve time-to-value and mitigate technical, business, and security risks.

Quinnox continuously invests in leveraging AI, leading to greater efficiency, predictability, and better results across the organization's investments in Quality. In the process, Quinnox has developed tools and techniques to test AI models, platforms, solutions, etc., to make AI adoption effortless and more economical.

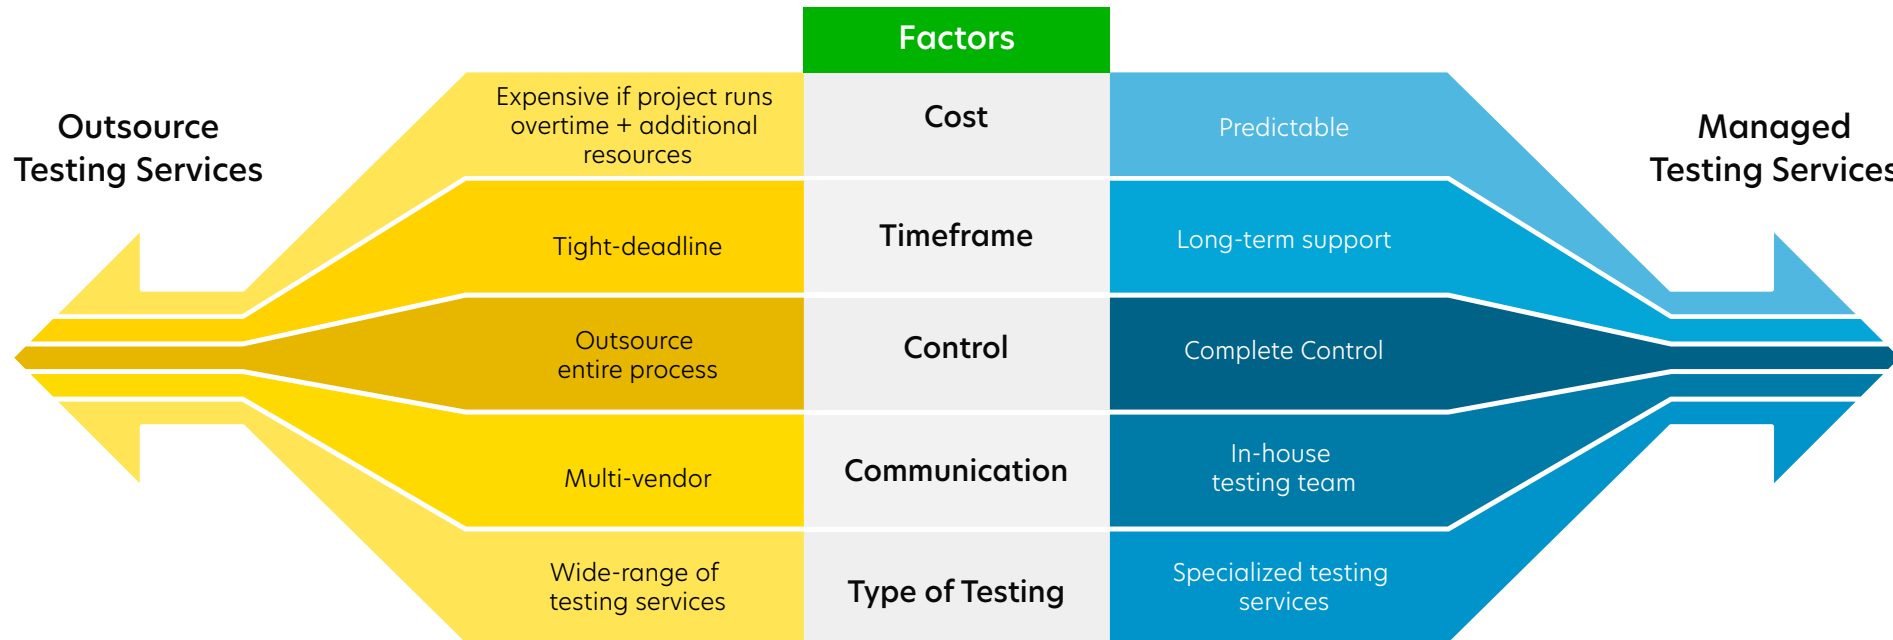

Quinnox Quality Commitment

Our dedication to delivering reliable engineering solutions reflects our commitment to driving down the cost of Quality. To ensure successful outcomes, we partner closely with clients and leverage our expertise to develop tailored strategies for various organizations, industries, and test maturities. As industry frontrunners for regulatory compliance transitions or cultural transformations for delivery teams, our team of experts provides top-tier support. We ensure you achieve goals quickly & successfully - no matter if you're migrating into the cloud ecosystem or implementing packages like SAP/S4 HANA/Salesforce, etc.

Find your right fit Managed Testing Services or Outsource Testing Services

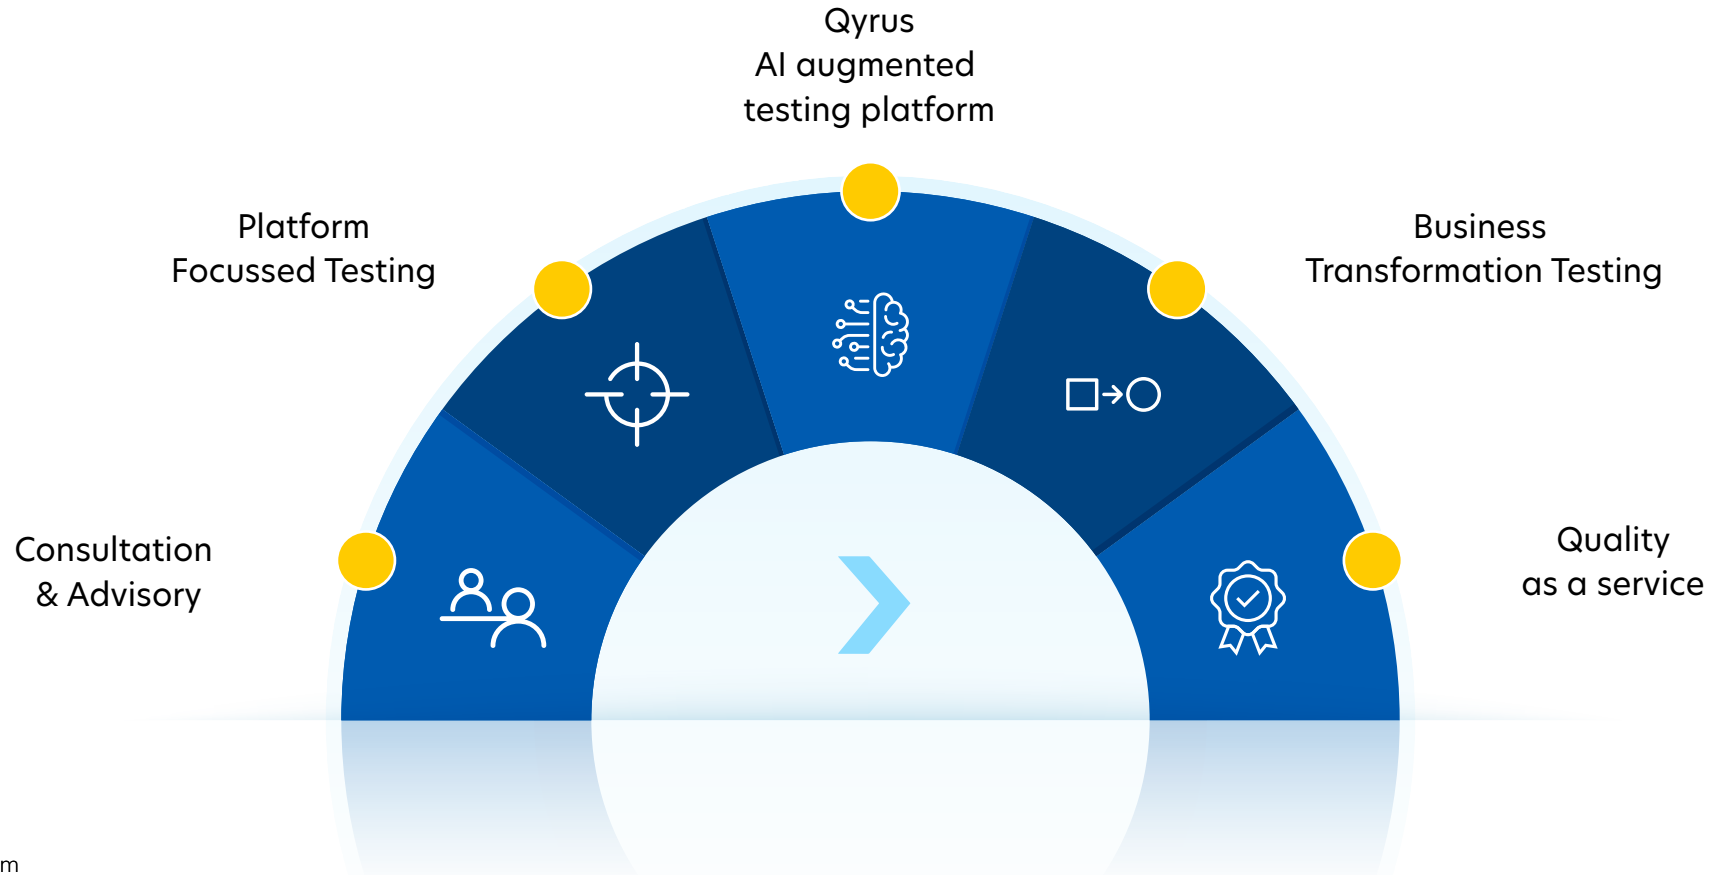

Choosing the right testing vendor fit for your organization requires carefully considering the abovementioned factors. While managed testing services provide ongoing support and predictable costs, outsourced testing services offer quick ramp-up times and can handle the entire testing process. Ultimately, the right choice depends on your specific testing requirements and your organization's needs.

Quinnox Offerings

Our forward-thinking approach ensures consistently high-quality solutions that meet our clients' needs. We provide tailored services across Consultation and Advisory, Platform Focussed Testing, Business Transformation Testing, and Quality-as-a-Service (QaaS), each with leading engineering methodologies and technologies to maximize your value.

Quinnox Offerings

Consultation & Advisory

Tap into the power of modern quality engineering solutions to transform your practice and take it further than you ever thought possible. Our solutions will help you standardize processes, supercharge efficiency, and reduce the cost of maintaining premium-level Quality - enabling your teams to reach their peak potential.

Platform Focussed Testing

Our expertise in package implementation ensures you have the support to optimize your IT capabilities and maintain robust quality measures with leading technology platforms like Salesforce, S4/HANA, and Calypso. Rely on our proven track record for a successful transition amidst technology changes.

Business Transformation Testing

Your business transformation journey just got easier. With our wide breadth of expertise across Digital, HR, Wealth Management, Financial Regulation, and eCommerce applications, we can ensure you stay ahead of the curve with industry changes while meeting your unique needs. Unleash the full potential of your organization through successful digital transformations today.

Quality as a service

Outpace your projects with world-class quality engineering services. Our comprehensive offerings, from automated test reporting and remotely managed automation to mobile compatibility testing and crowd-sourcing capabilities, can help you exceed expectations for timeliness and efficacy. Tap into the power of our Test Automation & Managed Services; Performance Engineering; Requirements Engineering; Mobile/Compatibility Testing; OAT/UAT Solutions - all backed up by industry-leading Data Services.

Qyrus - AI augmented testing platform

Qyrus is a comprehensive, codeless, and highly intelligent test automation platform for all things digital. It efficiently tests Web, Mobile, and APIs with a single AI-powered cloud-based platform that detects and eliminates bugs earlier in the software development lifecycle. Its codeless, taxonomy-driven interface helps increase test coverage and eliminates the need for time-consuming custom frameworks and expensive test infrastructure. It is an end-to-end solution for all your testing needs.

Quinnox AI-driven Test Automation Platform has been recognized by Leading Analysts
